UT-E-E30 is a subtracted cDNA library constructed
according to Bonaldo, Lennon and Soares Genome Research,
6:791-806, 1996. First strand cDNA synthesis was primed
with an oligo-dT primer containing a Not I site. Double
stranded cDNA was ligated to an EcoR I adaptor, digested
with Not I, and cloned directionally into pT7T3-Pac
vector. The oligonolectide used to prime the synthesis of
first-strand cDNA contains a library tag sequence that is
located between the Not I site and the (dT)18 tail. The
sequence tags for this library are: fetal eyes,
AGAATCAAGA; lens, CGATTAGCGA; eye anterior segment,

Patent No. 5472858
GENERAL INFORMATION:
APPLICANT: Attie, Alan D
APPLICANT: Gretch, Daniel G
APPLICANT: Sturley, Stephen L
APPLICANT: Beckage, Nancy E
TITLE OF INVENTION: Production of Rec;
TITLE OF INVENTION: Insect Larvae
NUMBER OF SEQUENCES: 2
CORRESPONDENCE ADDRESS:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      ADDRESSEE: Quarles & Brady

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
